

## Ultrasonic Facial Massagers: New Microdermabrasion!

Reduce wrinkles, freckles, stains and double chin with an ultrasonic facial massager. Skin treated with our revolutionary facial massager looks younger, because it is healthier from the inside out. This facial massager is similar to the expensive ultrasonic microdermabrasion machines used in high-end beauty salons. Now you can enjoy this skin care product in your own home!

### Why Anti-Aging Cream Doesn't Help Your Skin?

The skin barrier is very important in order to protect your skin, however it also has a negative affect in respect to beauty treatments, because it interferes with the absorption of nourishment products such as creams and lotions.

Fortunately, our facial massagers help to permeate cosmetic ingredients into your skin by using micro-vibration and galvanic ion. Ultrasonic Facial Massagers enhance the absorption of nourishment products to reach an incredible revival effect!

### How to Reduce your Wrinkles within 28 days with Ultrasonic Face Massager?

The ultrasonic vibration of your facial

In **only 10-15 minutes** daily, you'll

micro massage is transmitted deep into your skin, so that it promotes metabolism and enhance the absorption of nourishment products to restore your skin!

see and experience beautiful changes to your face; Your skin will appear **more youthful, smooth and healthy within 3 days.**

## Major Skin Benefits of Ultrasonic / Ion Facial Massager

### Reduce Wrinkles

Cosmetics with nourishment should permeate into the skin to have a revitalizing effect; however most of the nourishment cannot be absorbed by your skin due to the different skin layers. Fortunately, our facial massagers help to permeate cosmetic ingredients into your skin by using micro-vibration and galvanic ion.

Ultrasonic Facial Massagers enhance the absorption of nourishment to reach an incredible revival effect.

### Reduce Freckles & Stains

Melanin pigmentation causes flecks, black spots and dark skin. It is reported that ultrasonic waves promote melanin oxidation and makes flecks pale.

Unlike flecks on the surface, black spots and dark skin are pale cells surrounding melanin on the base layer changed to dark color and seen through on the surface.

Ultrasonic vibration of the facial massager and heat action promotes elimination of melanin in pale cells of the deep epidermis to keep skin white and beautiful.

### Reduce Double Chin

The micro massage of the Facial massager's influences water inside and outside of the cells, helps lymphatic circulation and removes the excessive water and waste under your skin. Ultrasonic Facial massagers bring you a feeling of facial slimming and lift-up.

*Your skin blocks the absorption of nourishment products*

*Fortunately, Fyola enhances the absorption of nourishment products*

### **Remove "eye-sack" and "black eye rim"**

Declined metabolism causes excess lymphatic fluid, excess fat and water under the eyes. As times goes by eye-sacks are formed. Short of sleep, overtired or obstruction of blood circulation also cause the forming of "black eye-rim".

The ultrasonic waves of this facial massager can accelerate blood and lymph circulation and carry excess fluid away. The ultrasound heat helps dissolve the fat so that the tissue can absorb it. Thus, black eye-rim is removed.

### **Prevent Blackheads and Pimples**

When the ultrasonic waves penetrate into the epidermis, instant strong pressure and vibration is locally generated to remove waste matter from the pores.

Blackheads or pimples come out because sebum blocks up pores. When ultrasonic vibration is transmitted to the skin, sebum in pores comes out easily due to the vibration. So generation of blackheads or pimples is preventable.

### **Frequently Asked Questions about Ultrasonic Facial Massager**

## How does Ultrasonic Skin Therapy Revitalize Your Skin?

With this revolutionary Anti-Aging product, your skin will appear healthier, smoother and more youthful. The ultrasonic wave of this facial massager permeates deeply into skin texture with transformed heat and micro vibration to reach revival effect. Ultrasonic wave is harmless to your facial bone and muscles. It permeates deeply into the skin, which accelerates blood circulation and removes waste.

### **Ultrasonic Wave is invisible for human eyes**

The ultrasound skin care product emits a deep micro-vibration so rapid, that cannot be seen or felt at the surface of your skin. So don't think your ultrasonic massager isn't working!

To see the transmission of the ultrasonic waves, put some water at the metal head of the face massager and touch the metal with one hand while holding the facial massager with the your other hand.

You will see the vibration of water, caused by the ultrasonic waves.
