

Benefits TDP Lamp CQ12B (Desktop Model)

- ✓ Raises the temperature in tissues
- ✓ Expands capillary vessels
- ✓ Rejuvenates cells
- ✓ Promotes blood circulation
- ✓ Helps move toxins from cells
- ✓ Improves Lymphatic system functions

Information

These portable TDP Lamp is easily transferred; aim them on any part of your body while awake, or when you sleep for a much deeper warmth. They are extremely useful during the harsh winter seasons and for the elderly.

The TDP Therapeutic Lamp features a plate coated with a proprietary mineral formation consisting of 33 elements. When heated by an electric heating element, this mineral plate emits a special band of electromagnetic waves in the infrared range of 2 to 25 microns in wavelength and 28 to 34 mw/sq.cm in intensity.

TDP lamp has proven itself to be effective in treating ailments such as joint pain, arthritis, back pain, injuries and some skin conditions like herpes and psoriasis etc. TDP lamp has been widely used in China to treat over many chronic conditions. Studies done in China show TDP Machines are effective for more than 100 ailments.

Specifications

- Built-in 60 min. timer
- Mineral Plate (lasts 1500 hours avg.)
- 110 volt, 250 watts
- Adj. multi-position head
- Minimum treatment distance 12"
- Heavy duty sturdy base

Safety & Cautions

Do not use the Infrared lamps if:
High fever,
open pulmonary tuberculosis, serious
arteriosclerosis,
tendency of bleeding,

This efficient therapeutic and strengthening device features a special heating plate with 33 mineral elements coating. Upon activation of the built-in electric heating, the plate emits far infrared waves for human body's maximum absorption. It is particularly helpful in promoting microcirculation, relieving pain, and strengthening immune system.

The emission wave length ranges from 2 to 25(microns) with intensity of 28 to 34 mw/sq.cm. Better absorbed than near infrared energy. This floor model therapeutic device is equipped with a 60 minutes timer for treatment convenience. The height of the emission head can be adjusted from 12" (for foot treatment) to 60".

abdominal pain,
over the eyes,
when body is wet,
if pregnant,
swollen inflamed area, with
hypertension must avoid head
application.

Keep out of the reach of children

TDP Lamp creates mineral infrared waves

TDP lamps were invented by the Chongqing Silicate Research Institute (CSRI) headed by Mr. Gou Wenbin in 1985. The TDP lamps are similar to yet different from far infrared lamps. TDP lamps create mineral infrared waves that treat numerous ailments, a few common ones being back pain, shoulder pain, joint pain and arthritis. After an intense study by research institutes, hospitals, and schools, the TDP Lamp was invented to mimic the properties of the clay.

TDP Lamp is different from Far Infrared Lamps

TDP lamps create mineral infrared waves that treat numerous ailments, a few common ones being back pain, shoulder pain, joint pain and arthritis. After an intense study by research institutes, hospitals, and schools, the TDP Lamp was invented to mimic the properties of the clay.

TDP Lamp contains 33 essential minerals

The key part of this lamp is its heat-treated black clay, which contains 33 different essential mineral elements for the human body. This ceramic plate emits a unique spectrum of electromagnetic waves in the infrared range of 2 to 25 microns, which is compatible with the BIO-spectrum waves released by the human body and allowing for maximum absorption. The absorbed energy promotes microcirculation, metabolism and strengthens immune system as well as tranquilized pain on the body.

TDP Lamp improve your body micro-circulation

TDP has the recuperative capacity to alleviate inflammation, tranquilize pain and improve micro-circulation, as well as stabilize the metabolism. Undisputed evidence has also shown that TDP is conducive to cell growth, multiplication and restoration, along with promotion of specific types of enzyme activity and immunity levels. Its regenerating abilities have seen regular use by many national athletic troupes, including ballet, soccer, martial arts, and the famous China women's Volleyball Olympic Team (champions of the 1984 Los Angeles Olympics).

These portable models are easily transferred; aim them on any part of your body while awake, or when you sleep for a much deeper warmth. They are extremely useful during the harsh winter seasons and for the elderly. The TDP Lamp's ease of use, flexibility and safety has earned several accolades, including: the Gold Medal at the 1986 Zagreb International Fair in Yugoslavia. In 1986, the TDP Lamp also won the Silver Star at the 35th Brussels World Fair for Inventions.
